

THE TOWNSHIP OF SANDWICH SOUTH

BY-LAW NO. 632

A BY-LAW to provide for Drainage

ESTIMATES

Work in the Township of Sandwich South, in the County of Essex, and for borrowing on the credit of the Municipality the sum of \$9755.00 being the estimated cost of repairing the Merrick Creek Drain, and for Building Bridge over same and paying costs of appeal.

Provisionally adopted the 30th day of October, A.D., 1928.

Whereas, written notice was served on the Municipal Council of the Township of Sandwich South by Hubert E. Shuel that the Merrick Creek Drain was badly out of repair.

And whereas, thereupon the said Council has procured an examination to be made by J. S. Laird, O.E.S., a person competent for such purpose, of the said area proposed to be drained, and the means suggested for the drainage thereof, and of other lands and roads liable to assessment under this act, and has also procured plans, specifications and estimates of the drainage work to be made by the said Engineer, and an assessment to be made by him of the lands and roads to be benefited by such drainage work and other lands and roads liable for contribution thereto, stating as nearly as he can, the proportion of benefit, outlet liability, and injurious liability, which in his opinion, will be derived or incurred in consequence of such drainage work by every road and lot or portion of lot, the said assessment so made being the assessment hereinafter by this by-law enacted to be assessed and levied upon the roads and lots or parts of lots hereinafter in that behalf especially set forth and described, and the report of the said Engineer, in respect thereof, and of the said drainage work being as follows:

To the Reeve and Municipal Councilors of the Township of Sandwich South.

Gentlemen:—Acting under your instructions I have examined and made a survey of the Merrick Creek Drain in your township and beg to report thereon as follows:—I find that the said Merrick Creek Drain in your township is badly filled up in many places and also with sediment, and is in need of repair. The said drain requires improving in order not to cause damages by flooding to the lands lying along and near said drain. I, therefore, recommend that the said Merrick Creek Drain be cleaned out and otherwise improved from the head of said drain at the 8th Concession Road westerly along the old drain to the townline road between the townships of Anderton and Sandwich West. The said improvement shall be made in accordance with the profile and specifications attached hereto. I have not recommended carrying the proposed improvement into the township of Anderton as I find the said drain in that township has a top width of over 50 feet and a depth of about 10 feet with a good fall— which I consider is a sufficient outlet for the waters from said Merrick Creek. I also recommend that a new cut be made for said drain from the 6th Concession Road West 48 rods, as is sketched out, near the centre line of lot 1. By making this new cut it will eliminate the constructing and maintaining of 4 concrete retaining walls and will therefore be considerably cheaper, in the long run, for the interested land owners whose waters have an outlet in said Merrick Creek. The said proposed new cut shall be made in accordance with the profile and specifications of same attached hereto. I also recommend that a new highway bridge be constructed over said drain at the 6th Concession Road as the present bridge is not wide enough to insure safety to the travelling public. The said bridge shall be constructed in accordance with the plan and specifications of same attached hereto. I also recommend that the 6th Concession Road be widened on that portion of road which parallels the said Merrick Creek Drain. The said widening shall be made in accordance with the specifications of same attached hereto. The Pere Marquette Ry. Co. has the option of doing that portion of drain situated on their property providing they do same within a reasonable time and without any unnecessary delay. In case they exercise their option and do said work they shall be paid the estimated cost of doing same. I find the cost of cleaning out and improving said drain, all works connected therewith and all expenses, together with the sum of \$596.95 which said drain owes the township of Sandwich South, to be \$9204.00. Of this amount I have assessed the township of Sandwich South for benefit to roads with the sum of \$250.50 and for outlet for the waters from said roads with the sum of \$632.15 and for a new highway bridge with the sum of \$877.50. The lots and parts of lots that will in any way be affected by said improvement I have assessed for benefit with the sum of \$1710.00 and for outlet for the waters from said roads with the sum of \$5700.85—all as is set forth in the schedule of assessments attached hereto. This drain shall be kept in repair by a tax on the lots and parts of lots and roads now assessed in accordance with the Municipal Drainage Act.

All of which is respectfully submitted.

(Sgd.) J. S. LAIRD, Engineer
Essex, August 15th, 1927.

Estimates for Cleaning out and Improving Merrick Creek Drain in the township of Sandwich South.—From stake 0 to stake 11, 132 rods, at \$3.90 per rod—\$514.80; from stake 11 to stake 18, 84 rods, at \$3.00 per rod—\$252.00; from stake 18 to stake 25, 84 rods, at \$3.25 per rod—\$273.00; from stake 25 to stake 32, 84 rods, at \$2.75 per rod—\$231.00; from stake 32 to stake 44, 144 rods, at \$4.25 per rod—\$612.00; from stake 44 to stake 53, 108 rods, at \$5.00 per rod—\$540.00; from stake 53 to stake 61, 96 rods, at \$5.55 per rod—\$533.00; from stake 61 to stake 66, 50 rods, at \$26.50 per rod—\$1325.00; from stake 66 to stake 75, 108 rods, at \$4.50 per rod—\$486.00; from stake 75 to stake 83, 96 rods, at \$4.85 per rod—\$465.00; from stake 83 to stake 91, 96 rods, at \$4.00—\$384.00; cost of excavation, \$5879.80; owners, spreading earth on lands and crops, \$321.00; new highway bridge at the 6th con. road, \$975.00; widening 6th concession road, \$150.00; amount for farm bridges, \$100.00; moving and putting back fences, \$35.00; 40 feet breakwater, west side P.M.R.R., \$185.00; brushing and grubbing, \$85.00; repairing breakwater on A. Bondy's place, \$20.00; what this drain owes the township, \$596.95; removing old bridge and new fill at 6th con. road, \$20.00; survey, plan, profiles, estimates, assessment, etc., \$424.50; paid men assisting, stakes, expense, etc., \$54.75; extra work for clerk, \$70.00; publishing by-law, \$85.00; Court of Revision, \$24.00; letting and superintending, \$298.00; total cost, \$9204.00; costs of appeal, \$551.00; total cost, \$9755.00.

SPECIFICATIONS

Specifications of the proposed improvement to the Merrick Creek Drain in the township of Sandwich South. Sides slopes 1 1/2 to 1 on both sides. Bottom widths as follows: From stake 0, West, to the P.M.R.R., 7 feet; from the P.M.R.R., west, to the 7th concession road, 8 feet; from the 7th concession road, west, to stake 37, 10 feet; from stake 37, westerly, to the 6th concession road, 11 feet and 12 feet the balance of the way. The excavated material taken from the said drain shall be disposed of as follows: Where there is no fence on either side of the drain cast 1-2 the earth on each side, keep back 5 feet from the edge of the finished drain and grade evenly over 30 feet on each side. Where there is a fence on one side, cast all the earth to the open side, keep back 5 feet from the edge of the finished drain and grade evenly over 30 feet. The following named owners shall receive the sums placed after their names for a farm bridge: Warren O'Neill, e 1-2 3, 7th Con., \$41.40; Albert Bondy, nw 1-4 3, 7th Con., \$47.70; John Webster, se 1-4 3, 6th Con., \$47.70; Harry Reynier, ne 1-4 2, 6th Con., \$20.70; Willie White, se 1-4 2, 6th Con., \$12.00; A. Hartley, w 1-2 2, 6th Con., \$18.30; J. O'Neill, nw 1-4 1, 6th Con., \$30.00; Hubert Shuel, pt 1, 6th-7th Concession, \$19.80; Albert Curtis, ne 1-4 1, 5th Con., \$28.80; A. Cloutier, nw 1-4 1, 5th Con., \$7.80; Ernest Bondy, sw 1-4 1, 5th Con., \$46.80.

The following named owners shall receive the sums placed after their names for a farm bridge: Warren O'Neill, e 1-2 3, 7th Con., \$50.00; Albert Bondy, nw 1-4 3, 7th Con., \$50.00. The West side of the 6th concession road shall be widened to a width of 24 feet on that portion of said road which Merrick Creek parallels said road. The road side shall have a slope of 1 1/2 to 1 and the new portion of said road shall be raised to a level of the present road bed. The material for same shall be obtained from the East end of proposed new cut on Mr. Shuel's property. The material in the wooden breakwater on the P.M.R.R. Co.'s right of way shall be used to repair the breakwater on A. Bondy's place. Said repairs shall be made under the directions of the commissioners in charge of the repairs. On the proposed new cut across Mr. Shuel's property, keep the North edge of the new cut 10 feet South of the centre line of lot 1. The material taken from new cut shall all be cast South, keep 6 feet from the edge of the finished cut and grade evenly over 50 feet. The contractor shall be liable for all damages caused by him not keeping the 6th concession road in a fit state of repair while the work is going on and until he has it taken off his hands by the commissioners in charge of the repairs. If the contractor removes any fences he shall put them back in as good shape as he found them, taking into consideration the material he has to deal with. If the contractor removes any bridges he shall replace them within 24 hours after their removal in as good condition as he found them. All trees, brush and rubbish that encroach at all on the sides or bottom of the drain shall be taken out and burnt to ashes. The above mentioned work shall all be completed to the full satisfaction of the commissioners in charge of the repairs. Monthly estimates will be furnished to contractors by the Engineer, said estimates to be not more than 80 per cent of the work actually performed but the paying of the full 80 per cent does not imply that any part of the work has been accepted.

Specifications of the proposed breakwater on Merrick Creek Drain, at the West limit of P.M.R.R. Co.'s right, in the Township of Sandwich South. The wall shall be 14 inches wide at the bottom and 6 inches wide at top. The wall shall be 8 1/2 feet in height and sunk 3 feet below the bottom of the finished drain at that point. The gravel used shall be of uniform quality and free from earthy material. Should the gravel, in the opinion of the commissioners, be too fine or have too much large material, they may

cause the contractor to add sand or have it screened as the case may be. The proportion of ingredients in the concrete shall be as follows: One part by volume of cement to 5 parts by volume of gravel. After the wall is in position, the contractor shall fill up the space between the wall and the land level with the top of the breakwater. The material for fill shall be obtained from the bottom of the drain. Supports for breakwater shall be constructed as directed by the commissioners in charge of the repairs. The contractor shall notify the commissioners before and when he intends to start work, and no concrete shall be put in position before the commissioners in charge have given their consent for same. The reinforcing for the breakwater shall be obtained by the commissioners and the contractor shall place it under their direction.

Specifications of the proposed new highway bridge over Merrick Creek Drain, at the 6th concession road, in the township of Sandwich South. The bridge shall conform to the plan of same attached hereto and these specifications. The abutments shall be placed at right angles to the roadway as will be staked out by the engineer. The reinforcing for same shall comply to the annexed plan. The gravel used shall be of uniform character and the gravel, in the opinion of the commissioners, be too fine or have too much large material, they may cause the contractor to add sand or to have it screened as the case may be. The proportion of ingredients in the concrete shall be as follows: The abutments and wings, 1 part by volume of gravel to 5 parts by volume of cement. The floor, 1 part by volume of gravel to 4 parts by volume of cement. The contractor shall notify the commissioners before and when he intends to start work and no concrete shall be put in position until consent for same has been given by the commissioners in charge. In the absence of the Engineer, the inspector in charge shall have full control over the work. The removal of the old bridge, disposal of the old material and the fill for same shall be under the direction of the commissioners in charge. The above work shall all be completed to the full satisfaction of the commissioners in charge of the work.

And whereas, the Engineer's Report was read at a meeting of the Council of the Township of Sandwich South, held Aug. 29th, 1927, and such strong objections to the proposed work were voiced by many of the interested parties as to be deemed it advisable not to adopt the report.

And whereas, Solicitors for H. E. Shuel made application to the Drainage Referee of the Province of Ontario for a mandamus to compel the Township of Sandwich South to proceed with the work.

And whereas, after an inspection of the drainage area the Referee issued the following Mandatory Order:—

IN THE ONTARIO DRAINAGE COURT

George F. Henderson, K.C., Drainage Referee.

Friday, the 8th day of June A.D., 1928. In the Matter of the Merrick Creek Drain.

Between Hubert E. Shuel and Louise A. Shuel, Applicants, and The Municipal Corporation of the Township of Sandwich South, Respondents.

Upon application made this day for a mandatory order requiring the respondents to clean out, repair and improve the Merrick Creek Drain, upon hearing what was alleged by Counsel for all parties and the parties hereto by their counsel consenting that this application be decided after an inspection of the said drain and the same having on this day been inspected.

1. It is Ordered and Adjudged peremptorily that the respondent, the Municipal Corporation of the Township of Sandwich South, do forthwith clean out, repair and improve the Merrick Creek Drain from its head at the 8th Concession Road in the Township of Sandwich South to the Townline Road between the Townships of Anderton and Sandwich West, in accordance with the report of J. S. Laird, dated the 15th day of August, 1927, and the plans, profiles, specifications, estimates and assessments annexed thereto.

2. It is Further Ordered that the Respondent do pay to the applicants their costs of this application forthwith after taxation thereof and that the same be taxed on the Supreme Court scale.

3. It is Further Ordered that the costs of the applicants and the costs of the respondents incurred in opposing this application upon a solicitor and client basis be added to and form part of the cost of the work ordered to be done and be borne by the whole of the area to be assessed pro rata.

(Sgd.)—
GEO. F. HENDERSON,
Drainage Referee

And whereas, the total cost incurred in the litigation amounts to the sum of \$551.00.

And whereas, in compliance with the Mandatory Order the costs of the Appeal have been added to the cost of the work, and have been assessed pro rata on the whole area, so that each and all original assessments have been increased accordingly.

And whereas, the said Council is now of opinion that the drainage of the areas described is desirable.

Therefore the said Municipal Council of the Township of Sandwich South pursuant to the provisions of

the Municipal Drainage Act, enacts as follows:—

1st. The said report, plans, specifications, assessments and estimates, with cost of appeal, are hereby adopted and the drainage work as herein indicated and set forth shall be made and constructed in accordance therewith.

2nd. The Reeve of the said Township may borrow on the credit of the Corporation of the said Township of Sandwich South the sum of \$755.00 being the estimated cost of repairing the Merrick Creek Drain and the costs of appeal and may issue debentures of the Corporation to that amount in sums of not less than \$50

each, and payable within 10 years from the date thereof, with interest at the rate of 5 per centum per annum, that is to say in 10 equal instalments of principal and interest combined, such debentures to be payable at the Canadian Bank of Commerce in the City of Windsor, and to have attached to them coupons for the payment of interest.

3rd. For paying the sum of \$1747.50, the amount charged against the said lands for benefit, and the sum of \$5861.85, the amount charged against the said lands for outlet liability, and the sum of \$447.51, the amount charged against the said lands and roads for costs of appeal,

apart from the lands and roads belonging to or controlled by the municipality, and for covering interest thereon for 10 years at the rate of 5 per centum per annum; the total special rate over and above all other rates, shall be assessed, levied and collected (in the same manner and at the same time as other taxes are levied and collected), upon and from the undermentioned lots and parts of lots, and the amount of the said special rates and interest shall be divided into 10 equal parts, and one such part shall be assessed, levied and collected as aforesaid in each year for 10 years after the final passing of this by-law, during which the said debentures have to run.
